

On Demand:

Virtual Classroom

You expect water to flow from a tap when you turn it on – in the same way a hosted virtual classroom should be there when you need it.

In a world where business operates at a breakneck speed, competition is fierce and knowledge is critical to the success of any venture – you need to be able to reach your audience fast. Using the On Demand Virtual Classroom you can deliver real-time learning to your employees, customers, suppliers and business partners located anywhere in the world.

The ability to distribute knowledge quickly, effectively and cost efficiently is a must for every organisation. Maximise the reach, frequency and effectiveness with this powerful and easy to use solution.

Pay per use sessions allow you to sign-up, schedule, deliver and report. Four easy steps to real-time training delivery.

Keeping it Simple

With Virtual Classroom On-Demand you can balance the functionality of just-in-time training with your budget.

Pay per user per session: no infrastructure costs, no set-up fees

With the IBM Lotus Virtual Classroom you can:

- Deliver rich and engaging, instructor led, learning over a Web browser
- Rapidly scale your training programs to reach more of your employees, faster and more effectively
- Reduce delivery costs including travel and expenses
- Record and reuse material for other sessions or be available on-demand to the organisation
- Reach a larger audience, to include customers and suppliers with timely information ranging from training to product news

On Demand:

Virtual Classroom

“E-learning is becoming a commodity. "Companies are looking at E-learning programs like a stapler or reams of paper-- it's just one item in their inventory”

Clark Aldrich, Gartner Group

Lotus Virtual Classroom Features

At the core of the On Demand offering is the Lotus Virtual Classroom managed and hosted by Corporate Learning Systems. Designed to ease the burden of infrastructure costs and management and lower the costs of learning delivery. The On-Demand solution offers a scalable, flexible solution that can be rapidly deployed. The solution allows you to be in control of the functions that are core to learning and training management and lets us take care of the infrastructure and management around the maintenance of the application.
